Q1. implemented in manual, can't fine a validateservercert in 3page.

A1. That is Registry Editor Tool Problem.

In that case, Download and Install a Resco Registry

Q1. validateservercert

Download: <http://blog.paran.com/dahpuekaro/41399795>

Install method: If undo a compressionCab, appear Cab file, after copy to OMNIA Phone, Double click and Installation

Reference: Start > Setup > System > Information > Device ID >
It is Your OMNIA Phone Name a Written thing by Device Name Title

Q2. I have to modify a Registry like a manual to Window Mobile?

A2. Yes. In below a Window Mobile OS 7.0

(Don't need a KT OMNIA Phone)
